PARTS & SERVICE

**FTms HORIZONTAL MULTILANE FIFO ACCUMULATOR**

for inconsistent primary pack flows

- easy to* **OPERATE**
- easy to* **INSPECT**
- easy to* **CLEAN**
- easy to* **MAINTAIN**

- SUITABLE FOR MANY TYPES OF CONTAINERS
- ZERO PRESSURE ACCUMULATION
- PRESERVATION OF PRODUCT ORIENTATION
- SECURED PRODUCT TRANSFERS
- UP TO 245 METER NETT BUFFERLENGTH
- CAPACITY UP TO 400 CPM (BASED ON PRODUCT 80 MM)
- 100% TRACEABILITY, GUARANTEED FIRST-IN-FIRST-OUT
- MULTIPLE FOOTPRINTS CONFIGURATIONS
- PROVEN 7TH GENERATION CONCEPT
- STAND ALONE INTEGRATED CONTROLS

- Square
- Rectangular
- Odd shaped
- Tapered
- Round
- PET**
- HDPE**
- Aerosol**
- Glass**
- Cans**

# Maximize your OEE

## Minimize downtime!

Proven Technology for various markets

### Line design

Our dynamic FiFo accumulator is well commended amongst its users. It is characterised by its total flat design, integrated controls, gentle product care and high capacity abilities because of its unique in- and outfeed system. The system has been proven successful in various markets ranging from dairy, beverage, spirits, ice-cream, H&PC and even chemical industries.

### Improve line efficiency

How well optimised is your system in terms of OEE? With the FTms positioned in between filling- and packing area, we are able to level out most of your short stops of down stream equipment. The upstream equipment can keep its cadence; your overall production efficiency (according to DIN 8782) will benefit from this optimised uptime. Buffered lines show an increased line efficiency of up to 20% in comparison with a line with close coupled machines.

### Configurations

To be able to fit the FTms in a production line with flexibility for layout integration, we have a total of 6 in- and outfeed configurations available. The FTms is available with 6-, 9-, 12-, 16- or 19 tracks varying between an overall length of min. 5,5m and max. 15m. Therefore it can easily be integrated in both new and existing lines.

### Ease of change over

Simplification and rapid change-over to other dimension container formats is a must for multi-format lines. This is achieved by utilizing an accurately fixed inner part of the satellite at both in- and outfeed. Without the need of tools these can be exchanged within 1 minute.

### Premium product care

We understand the importance of your primary packaging, it needs to be handled with the utmost care. This FTms accumulator has a special designed in- and outfeed satellite, equipped with a unique rubber, which will guide your product on and off, without back pressure on the accumulation system.
